R45T

UV & Ozone Resistant NR Tubing

R45T tubing starts with the same abrasion resistant natural rubber compound as our premium R40T Tan Pure Gum Tubing.

R45T is engineered with a tested blend of anti ozone additives to provide protection from sun damage and ozone attack.

When exposed to light and ozone, the additives react to the attack by darkening and shielding the Tan Pure Gum.

After exposure to the elements, **R45T** retains the excellent abrasion characteristics offered by Tan Pure Gum.

Test sample of Compound R45T with Anti-Ozone Additives. Darkened in Color.
NO Cracks
NO Dry Rot

Test sample of Compound R40T Discolored and Cracked from light & Ozone exposure
